

## Financial Estimates

The financial estimates found on the links below are provided to assist nonimmigrant international students in budgeting finances for their duration of studies at Regent University. These estimates are for one academic year only. It is the student's responsibility to provide sufficient funds for each year of study, without relying on employment. If a student's financial situation changes from that which is listed on the I-20 or DS-2019, it is the student's responsibility to request a new I-20 or DS-2019 through the Office of International Student Services (OISS) with new financial documentation.

Students are allowed to work on-campus for a maximum of 20 hours per week and full-time during academic break periods. It is the responsibility of the students to seek their own on-campus employment and money earned should be counted only as supplemental income for unexpected expenses.
